Passionate about technology and innovation

Name: Thanooj Daggu

Email: daggut1@udayton.edu

Phone: +1 9375039752

Profile: Master of Science
in Computer
Science

Technical Skills

Amazon Web Services 90%

PHP 85%

Front-end Technologies 80%

Data Analysis 75%

I am a highly motivated and proactive graduate student pursuing a Master's degree in Computer Science at the University of Dayton. With a solid foundation in electronics and communication, I have transitioned into

Devlofox Technologies, where I developed responsive web applications, optimized performance, and integrated APIs to solve complex business challenges. I also gained valuable data analysis experience at Deloitte, where I helped create detailed reports to support data-driven decision-making for clients. I am skilled in Amazon Web Services, PHP, and front-end technologies, with a passion for cloud technologies, data analysis, and AI-driven solutions. I am actively seeking opportunities in data analysis and software development to apply my technical expertise and innovative mindset toward creating impactful solutions.

A showcase of my interactive and technical web projects

Live Clocks

Displays both a digital and analog clock, updating in real time using JavaScript. This demonstrates real-time data handling and canvas drawing.

11:34:21 PM

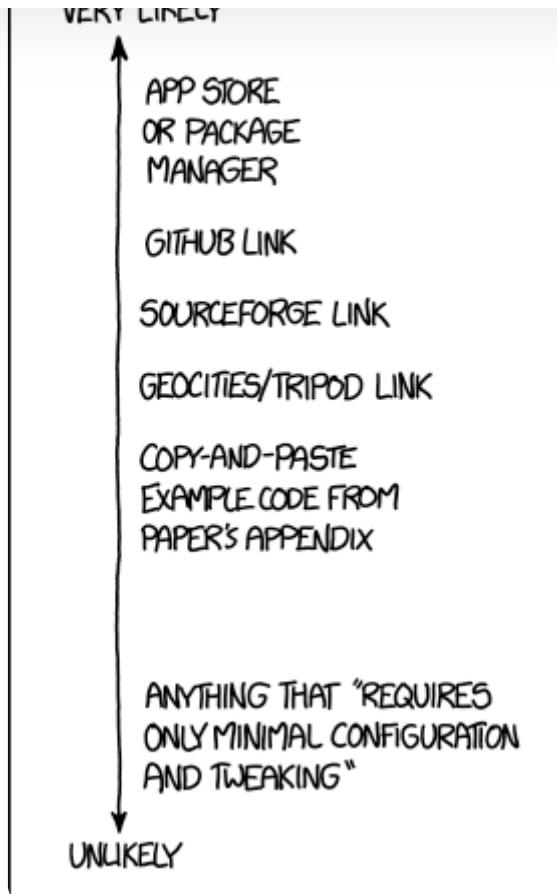

Joke of the Minute

Fetches a new programming or pun joke every minute from the JokeAPI, showcasing external API integration and asynchronous operations.

A byte walks into a bar looking miserable. The bartender asks it: "What's wrong buddy?" "Parity error." it replies. "Ah that makes sense, I thought you looked a bit off."

Random XKCD Comic

Displays a random XKCD comic using a public API and a CORS proxy, demonstrating image loading and error handling for external resources.

#1742: Will It Work

Disclaimer: The jokes and comics displayed on this page are generated by public/third-party API services (JokeAPI)
